## OpenStack Infrastructure and Project Status

### Zuul

Zuul is the project gating and automation system that tests and merges changes as well as publishing releases and documentation.

### Rechecks

When the cause of a test failure is nondeterministic, developers can request that it be retested by leaving a comment in Gerrit of the form "recheck bug #". This page collects those comments and displays graphs indicating the timing and frequency of these bugs.

### Reviews

Important reviews are ranked according to blueprint and bug priority.

### Bugday

During official bug days, this page is updated with real-time stats.

### OpenStack-Health

A test results dashboard.

## Welcome to the OpenDev Wiki

The OpenStack Mission is to produce a ubiquitous Open Source Cloud Computing platform that is easy to use, simple to implement, interoperable between deployments, works well at all scales, and meets the needs of users and operators of both public and private clouds.

OpenStack is [open source](#), [openly designed](#), [openly developed](#) by an [open community](#).

The OpenStack wiki is a collaboration tool for the community to publish various documents in a collaborative manner. Content may be out of date or inaccurate. Please refer primarily to other OpenStack websites for reference information (see below).

### Help in using the wiki

- [How to use this wiki](#)
- Learn [Wiki markup](#)
- [Editing pages](#)
- [Tracking changes](#) and setting up a [Watchlist](#)
- Interested in quick collaborative editing? Try out [Etherpad](#)
- In need of a collaborative spreadsheet? Try out [Ethercalc](#)
- Looking to paste and link arbitrary text? Try out [Lodgelt](#)
